

Magic the Gathering Guide by Denis Sakipi

Welcome to the Magic the Gathering card Generator.

Here are the steps on how to use the program:

1. Initiate the program by double clicking on the index.html file.
2. The program will open on your web browser.
3. You will see an input field for your username, please fill it.(Keep in mind the username should be at least 3 characters long, and the first letter should be an uppercase letter).
4. After inputting your name, left-click on the Submit button
5. Now the program takes you to a second page
6. On the top you will see a Welcome Message with the Username you inputted.
7. A loading element is shown until all the cards are prepared for you
8. Beneath the "Welcome Message" a search bar is shown.
9. The first element in the bar gives you the option to search the cards by Name.
10. The Second element gives you the option to search by type.
11. The third Element gives you the option to search by color.
12. On the Fourth Element you can sort the Cards by Ascending or Descending order.
13. You can initiate the Search by clicking on the Search button which is the last element of the search bar
14. You can try combinations between name, type, color, and sorting them.
15. Sometimes a combination will not show you any cards, in this case A red text is shown telling you that no combination was found.
16. Have Fun!
